company overview

GBA Projects is a leading South Australian Project Management company specialising in the delivery of “on time and on budget” projects minimising the risks of complex developments.

Founded in 1986 by Company Director Greg Betros, GBA Projects combines local, national and international market knowledge and experience with technical excellence resulting in cost effective, functional and result driven solutions.

Proven success on major projects around the globe is testament to GBA Projects hard-earned reputation as industry leaders.

GBA Projects ensures complete project planning, control and management from inception to completion. Tailoring its approach to suit specific client needs, GBA Projects has continued to secure local, national and international contracts providing the highest quality service and solutions.

Major projects include: The **Olympic Dam Expansion** (BHP Billiton), **Kallang – Paya Expressway** (Singapore), **Newcrest Mining Hire Development Project** (West Africa), **River Trade Terminal** (Hong Kong).

GBA Projects prides itself on the following principles;

- Placing client needs above all else;
- Establishing clear and achievable objectives;
- Emphasising proper planning with a focus on the integration of scope, time, cost and risk;
- Providing the highest quality service;
- Employing exceptional people.
- Ongoing education and development of staff;

“GBA Projects is a perfect mix of experience and youth combining extensive market knowledge with technical excellence and innovative project outcomes.”

Greg Betros, Managing Director, GBA Projects

“We are strong believers in the continuity of our services and we guarantee our professional services for our clients from inception to completion.”

Matt Betros, Director, GBA Projects

Grenfell Street, Adelaide, South Australia

our vision

GBA Projects is committed to excellence in tackling the most complex challenges and projects head on. Our systematic, consistent and highly disciplined approach ensures quality results across all industries and locations.

our people

'You are only as good as the people around you' is an old adage that rings true for GBA Projects. Exceptional staff equals exceptional results and this is a culture that GBA Projects has worked diligently to maintain. On-going education, professional development, strategic leadership and continuing guidance of team members are all essential elements the GBA Projects team prides itself on.

our values

Commitment to quality solutions, systematic attention to detail, measurable results and overwhelming client satisfaction are all core values of GBA Projects.

our system

GBA Projects has developed a proven methodology that has been instrumental in the successful provision of project and construction management services, including planning, scheduling, monitoring and control of projects nationally and internationally.

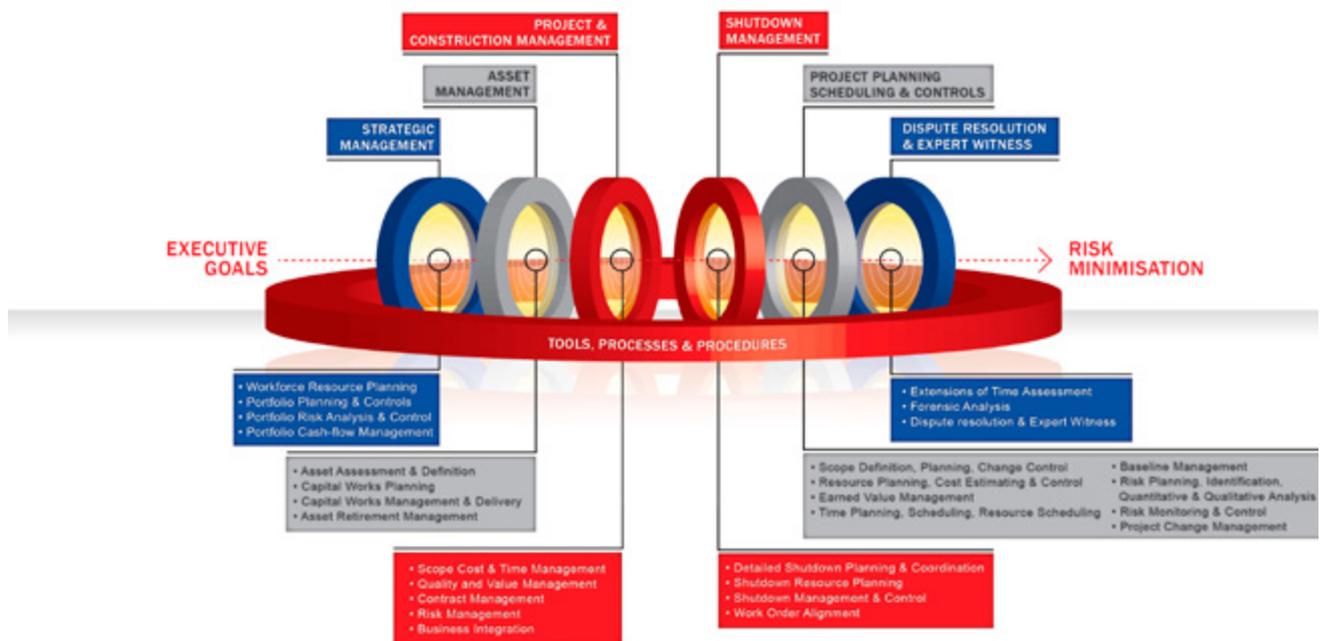

Graham Farmer Freeway, Western Australia

services model

Cost and time are two of the most crucial elements in any project. GBA Projects has an acute understanding that a project's success depends on these parameters and offers the highest quality systems to get the job done, on time and on budget.

Drawing upon the highest quality industry expertise and upholding exceptional standards means GBA Projects take on the responsibility to ensure that risks are identified, qualified, quantified and mitigated for complex projects.

The primary challenge is to provide clients with a cost effective full service delivery ensuring a tailored approach to each project.

Projects are a direct result of strategic planning for a business. When a project fails it often creates exposure for the business and its owners. For a business to truly realise the benefits of any project it must ensure that the right people, tools, processes and procedures are in place to shield and safeguard itself from risks becoming reality.

GBA Projects provides the people, tools, processes, and procedures to create the necessary defensive barriers at both project and portfolio level to minimise corporate risk and enhance performance.

"Failing to properly plan and establish an accurate dollar value on a project can have disastrous results."

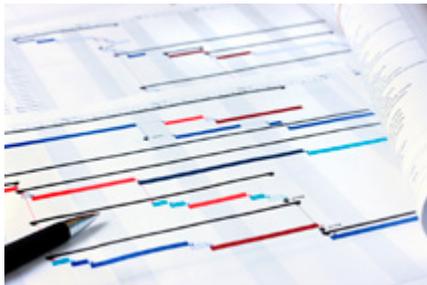

Luke Betros, Director, GBA Projects

Sulphuric Acid Plant, Mount Isa, Queensland

- Logistics

past clients

GBA Projects has provided services to many clients around Australia and South East Asia for 30 years. Some of our key clients include:

Collins Class Submarines

quality assurance

For over 30 years, GBA Projects has acquired knowledge from various industries allowing it to develop the GBA Projects EPCM Framework, a methodology framed by the GBA Projects Quality Manual. This manual dictates the stringent quality processes required in order to successfully plan, monitor, control and manage projects of size and scale.

“What we’ve seen in the last 30 years is the ability for a project to fail, simply because the integrated project team failed to plan properly”.

Greg Betros, Managing Director, GBA Projects

client testimonials

“GBA Projects has all the necessary skills and expertise to provide planning solutions to any process associated with the many facets of construction. The ability to apply the necessary logic for the integration of these activities into processes alien to the construction industry is

Gerald Lewis, Building Consultant to John Holland & Lend Lease

“I have known and worked with the GBA Projects team for many years and I’m always happy to recommend their skills and capabilities to our clients.”

Pat Weaver, Managing Director, Mosaic Project Services

OUTLOOK FOR

management team

Our management team boasts over 85 years of combined experience in projects around the world. Our consultants are highly talented experts with a passion for our clients and their projects.

A GBA Projects employee is a creative, out-of-the-box thinker, a leader and not a follower.

Greg Betros

Managing Director, B.E, MIE Aust, FAIPM

Greg Betros, BE, MIE Aust, FAIPM a qualified Civil Engineer, is an industry leader in project planning, management and control. Greg has an internationally recognised career with more than 30 years experience across multiple industries.

Greg's experience and expertise has

culminated in him being made a Fellow of the Australian Institute of Project Management.

Greg's passion and enthusiasm for Quality Project Management and Controls Services has led to the ongoing application of GBA Project's philosophies to projects the world over.

Matt Betros

Director, B.CIS, B, MNGT, Dip. PM, MAIPM

Matt has worked on some of the most ground breaking projects in South Australia, such as the Adelaide Central Reinforcement Project, Olympic Dam Expansion and South Road Superway while also providing support to projects across Australia, New Zealand and the United Kingdom.

Matthew's expertise in Risk Management, planning best practices and Forensic Analysis allow GBA Projects to bring added value to a project's control and contract administration functions.

Luke Betros

Director, B.E(Mech), BMa&CompSc, MAIPM

Luke's knowledge and incredible attention to detail is what is responsible for his well-known reputation and sort after expertise within the oil, gas and petrochemical industries.

Luke provided project control support to the Mt Isa 2014 turnaround which was delivered on time and on budget. The project won two AIPM awards in

the Regional and National categories.

Along with being qualified in Computer Science, Luke's extensive knowledge in Engineering and Information Technology ensures he is able to efficiently achieve client deliverables against varied platforms.

David Lynch

Senior Associate

David Lynch has more than 30 years of industry experience which has earned him one of the most respected names in the construction industry. David's laudable career has seen him leave his mark on projects domestically and internationally with a proven track record for exceptional results and innovative methodologies.

David's numerous specialisations include alternative building solutions, value engineering studies, multi discipline building solutions, construction methodology and building technology.

David is an award winning practitioner being recognised both in Australia and South-east Asia.
